Program Description

The New England Board of Higher Education (NEBHE) has established a regional program under which qualified residents of the region may receive reduced tuition rates when attending college in another New England state. The major chosen must be one that is not available in the student's home state (as approved by the public institution in the home state) and that is indicated as available for the tuition reduction by the institution the student plans to attend. Each participating New England institution designates which of its programs will be offered under this program once they are approved by the other states. Information may be obtained from any New England high school guidance office or the NEBHE website (nebhe.org) using the online lookup.

Majors Available

Connecticut

Biological Engineering
Electrical Engineering Technology
Forest Operations Science
Forestry
Marine Science
New Media
Pulp and Paper Technology*
Surveying Engineering Technology
Sustainable Agriculture
Zoology

Massachusetts

Biological Engineering
Botany
Construction Management Technology
